Dated: 15/5/2018

To Whomsoever it may concern

On the request of Chairman, Doon Public School, Roorkee, School building was checked and inspected for the following purpose:

a. Construction, quality and safety Measures:

Building is having class A construction and about 12 years old and safe for School purpose as is 'A' class construction carried out as per safety measures. On inspection it was observed that necessary safety measures are carried out.

b. Building is having proper installation of fire extinguishers and thus able to meet out fire eventuality.

It was informed by the Principal that supporting staff are well trained for fire fighting and school is having an inspection report from fire department and on our inspection we found that arrangements in order. School is having RO system for pure water, which is safe for students and staff besides proper sanitation. On inspection building is found perfectly safe construction with proper fire, sanitation and drinking water.

The building was completed sometimes in the year 2006 and as per the quality of the construction, the building is safe and future life is expected to be 25-30 years provided proper maintenance of building carried out time to time as required.
